M What are the best uses of generative AI in the legal environment?

Show drafts ▾ 

✦ Generative AI is a rapidly evolving field, and its potential applications in the legal environment are vast and exciting. Here are some of the most promising areas:

Increased efficiency and productivity:

- **Document automation:** Generate standard contracts, legal notices, and other frequently used documents based on templates and specific inputs.
- **Legal research:** Summarize cases, identify relevant precedents, and answer factual questions, saving lawyers time and effort.
- **E-discovery and review:** Identify and categorize relevant documents in large datasets, reducing manual review time and costs.

Enhanced legal analysis and argumentation:

- **Generate first drafts of legal briefs and memoranda:** Provide a factual and legal framework for lawyers to build upon.
- **Identify legal arguments and counter-arguments:** Analyze complex legal issues and suggest potential approaches.
- **Translate legal documents and communications:** Improve accessibility and collaboration across borders.

Improved access to justice:

- **Create self-service legal tools:** Help individuals understand their legal rights and options, particularly in pro se cases.
- **Personalize legal advice:** Generate tailored legal information based on individual

- **Create self-service legal tools:** Help individuals understand their legal rights and options, particularly in pro se cases.
- **Personalize legal advice:** Generate tailored legal information based on individual circumstances.
- **Provide legal assistance in underserved communities:** Offer limited legal guidance where access to lawyers is limited.

However, it's important to consider the limitations and challenges as well:

- **Accuracy and reliability:** Generative AI is still under development, and its outputs need careful human review and validation.
- **Bias and fairness:** AI models can inherit biases from their training data, leading to discriminatory or unfair outcomes.
- **Transparency and explainability:** Understanding how AI models arrive at their conclusions is crucial for legal applications.
- **Ethical considerations:** Issues like data privacy, intellectual property, and potential misuse require careful attention.

Overall, generative AI holds immense potential to improve the legal field, but its responsible development and implementation are crucial. It's not about replacing lawyers, but rather empowering them to work more efficiently and effectively, while enhancing access to justice for all.

As this is a rapidly evolving field, it's important to stay up-to-date on the latest developments and engage in informed discussions about the ethical and responsible use of generative AI in the legal environment.

Adobe launches AI assistant that can search and summarize PDFs

PUBLISHED TUE, FEB 20 2024·10:19 AM EST | UPDATED TUE, FEB 20 2024·1:04 PM EST

Alex Koller
@ALEXKOLLER_SHARE    **KEY POINTS**

- Adobe launched an artificial intelligence assistant in its Reader and Acrobat applications that can produce summaries of and answer questions about PDF documents.
- Other AI models such as ChatGPT offer PDF readers that similarly expedite analyses of lengthy documents, but those services require users to upload a PDF. Adobe's AI assistant is a built-in feature.
- Adobe plans to release a subscription plan for the tool after it is out of beta.

What if ROI

workday.

All you have to do is ask. Chat with your doc.

Meet AI Assistant (beta) in Acrobat. Interact with your document in the desktop or web app for quick answers and one-click summaries. Then use those insights to create impactful content and level up your productivity.

[Start free trial](#) [Watch video](#)

**Available only in English on the latest version of Acrobat desktop and web paid subscriptions and the Acrobat Pro trial. Coming soon to Acrobat Reader. Not supported on mobile devices.*

The screenshot shows the Adobe Acrobat AI Assistant interface overlaid on a document titled "THE RISE OF PICKLEBALL AS A RECREATION SPORT". The AI Assistant window has a title bar that says "AI Assistant (Beta)". Below the title bar, it says "Here are some suggestions you can try:" followed by three suggested questions:

- What is the average age of pickleball enthusiast?
- How are points scored in pickleball?
- Who invented pickleball?

At the bottom of the AI Assistant window, there is a text input field with the question "How much has pickleball grown in the past year?" and a send button (a right-pointing arrow). The background document text is partially visible, including sections like "Pickleball's Evolution, Popularity, and Global Impact" and "PARTICIPATION RATES IN RECREATIONAL SPORTS".

- Summarizes long pdf documents
- Answers questions about the information in the documents with a “conversational interface,” with links to the locations within the document
- Creates study guides

Study Guide for The Great Gatsby by F. Scott Fitzgerald

1. Summary:

- The Great Gatsby is a novel set in the 1920s, following the life of Jay Gatsby, a wealthy and mysterious man, as seen through the eyes of Nick Carraway, the narrator.
- The story explores themes of wealth, love, and the American Dream, as Gatsby tries to win back his lost love Daisy Buchanan, who is married to Tom Buchanan.
- The novel delves into the decadence and excess of the Jazz Age, as well as the emptiness and moral decay that lies beneath the surface of the wealthy elite.

2. Characters:

- Jay Gatsby: The enigmatic millionaire who throws lavish parties in the hopes of winning back Daisy Buchanan.
- Daisy Buchanan: Gatsby's former lover, who is married to Tom Buchanan.
- Tom Buchanan: Daisy's husband, a wealthy and arrogant man who is having an affair with Myrtle Wilson.
- Nick Carraway: The narrator of the story, who becomes friends with Gatsby and observes the events unfold.
- Jordan Baker: A professional golfer and friend of Daisy's, who becomes romantically involved with Nick.
- Myrtle Wilson: Tom Buchanan's mistress, who is married to George Wilson.
- George Wilson: Myrtle's husband, who owns a garage in the Valley of Ashes.

3. Themes:

- The American Dream: The novel explores the idea of the American Dream and its corruption, as characters pursue wealth and success at any cost.
- Wealth and Class: The divide between the wealthy elite and the working class is a central theme, as characters navigate social hierarchies and the pursuit of status.
- Love and Desire: The novel examines the destructive power of love and desire, as characters make choices based on their passions and desires.
- Illusion vs. Reality: The characters in the novel often create illusions and facades

contract review, but provides a synopsis of exactly how each highlighted point differs from your parameters, allowing you to focus on the actual work. So how do we negotiate a clause that doesn't work for our company? See step three.

3. Two become one: marrying the contracts

The rage: Now THIS is where things get interesting. Here, the rage doesn't always come from our side. Now that we're on this negotiation journey armed with technology, what's next? Traditionally, most redlining tools on the market would take the highlighted clause or portion of the contract that differs from your standard language and simply replace it with standard language laid out in your system. Time saving, yes. True negotiation? Not quite. To quote Agiloft's Chief Product Officer Andy Wishart, "...simply swapping out their clause with yours is a bold move. It's not negotiation, it's just trying to force a particular position."

The peace: Whether a first-time agreement or a renegotiation with a longtime partner, taking time to make strategic and thoughtful deletions and insertions, that ultimately benefit both parties, is a simple way to not only expedite and streamline the negotiation process, but set yourself up to be a preferred partner moving forward. When you're easier to do business with you become the one people *want* to do business with. Now, I know your burning question – can tech help with that? It can! Agiloft's new GenAI redlining tool takes contract assistance further by leveraging AI to marry clauses from an incoming contract to your library of standard and approved clauses. Instead of a simple find and replace, you can create a brand-new clause that takes into account both your and your counterpart's requirements to create a mutually beneficial redline. What's more peaceful than that?

Search For Cases

Welcome to The Future of Case Briefs.

Use the Search Bar Above to Search by Case Name.

🌟 Features:

Gunnerbot

Say hello to our revolutionary 'Gunnerbot'. Imagine having a direct conversation with a case—asking questions, seeking clarification, and getting answers in real-time. Gunnerbot transforms passive learning into an interactive experience, enhancing your understanding of the law.

"ELI5" Mode

We invented 'Explain Like I'm 5' Mode because pursuant to certain demands inherent to efficient pedagogy, it is not requisite for us to exclusively employ obfuscated legal verbiage in the entirety of contexts. Translation: Sometimes we just want things spelled out simply.

Instant Brief Generation

Looking for a case that isn't in our system? No problem! With our new brief generation tool, simply enter in the case name, year, and reporter and hit 'Go'. In 3 minutes or less your case will be briefed, ELI5'd, Gunnerbot-ingested, and ready to use!

Hallucination Free

AI doesn't have to be the boogey man. We've all heard the stories. That's why we designed our proprietary Primary Context Reinforcement system, so you can rest assured that our information is case-text accurate every time.

8,000 Cases and Growing

We're just getting started. We decided to roll out our beta version with just over 8,000 strategically chosen cases. This should cover the basics, but rest assured: we've only just begun. Our target is 50k in the first year. Looking for a case we don't have? Use our Case Upload system to add it in less than 3 minutes!

For Students By Students

Built with love by 3Ls, Lexplug is the product of nearly three years of experience with legal education tools. We're proud to offer a premium platform, infused with the insights, experiences, and goals gathered from our studies. We've created a tool designed to not just meet, but exceed expectations.

https://youtu.be/b9KS4OhF0jE

The screenshot shows the Lexplug website interface. At the top, there is a navigation bar with links for 'About', 'Demos', 'FAQ', 'Pricing', and 'Briefs', along with a user profile for 'Bradley'. A search bar labeled 'Search For Cases' is prominently displayed. The main content area features a case entry for 'Pierson v. Post', identified as a Supreme Court of New York case (3 Cai. Cas. 175 (N.Y.Sup.) (1805)). A red rectangular box highlights a toggle switch labeled 'ELIS:' next to a small information icon. Below the case title, the 'Rule of Law' section states that property in wild animals is acquired by occupancy. The 'Facts' section lists four bullet points detailing the case's background. The 'Issue' section poses the legal question of whether the plaintiff's actions constituted occupancy. The 'Opinions' section is partially visible at the bottom. On the right side, there is a 'Gunnerbot' chat interface with a text input field and a button labeled 'Ask Pierson v. Post a...'. A video inset in the bottom right corner shows a man with a beard and headphones, likely the presenter.

Search For Cases

Pierson v. Post

Supreme Court of New York
3 Cai. Cas. 175 (N.Y.Sup.) (1805)

ELIS: ⓘ

Rule of Law:

Property in wild animals (*ferae naturae*) is acquired by occupancy, which requires actual possession, not merely pursuit or wounding.

Facts:

- Lodowick Post (plaintiff) engaged in the pursuit of a fox with his hounds.
- Pierson (defendant), aware of the chase, intercepted and killed the fox, taking it away.
- The legal dispute centers on whether Post's actions constituted occupancy, giving him property rights in the fox.
- The case was decided at a lower court and has been brought before the Supreme Court of New York on certiorari.

Issue:

Did Lodowick Post acquire property rights in the fox by pursuing it with his hounds, sufficient to sustain an action against Pierson for killing and taking the fox?

Opinions:

Gunnerbot:

Query [Pierson v. Post \(1805\)](#) directly. You can ask questions about any aspect of the case. If it's in the case, Gunnerbot will know.

Pierson v. Post

Supreme Court of New York
3 Cai. Cas. 175 (N.Y.Sup.) (1805)

ELI5:

Rule of Law:

To own a wild animal, you need to actually catch it, not just chase it.

Facts:

- Post was chasing a fox with his dogs, trying to catch it.
- Pierson saw this, but he went ahead and killed the fox and took it for himself.
- The big question is whether chasing the fox made it Post's property.
- The case went through the lower courts and is now being reviewed by the Supreme Court of New York.

Issue:

Did chasing the fox with dogs give Post the right to own the fox, and to sue Pierson for taking it?

Opinions:

Majority - Tompkins (J.)

No, just chasing the fox doesn't make it yours. You need to actually catch it. Old

Explain Like I'm 5

'ELI5 Mode' translates legal jargon into normal language that you can understand quickly.

Gunnerbot:

Capitalism is a type of economic system where private individuals and businesses own and control the production and distribution of goods and services, rather than the government. This means that individuals are free to create products and services and sell them for profit, and consumers are free to choose which products they want to buy. An example of capitalism is a person opening a lemonade stand and selling cups of lemonade to their neighbors. The person is able to set a price for the lemonade and keep the profits, as opposed to the government setting the price and taking the profits.

According to a report by Forbes, the United States is the most capitalist country in the world, with a score of 85.6 out of 100 on the Heritage Foundation's Index of Economic Freedom. This means that the U.S. has a strong emphasis on individual freedom, private property rights, and free markets.

A helpful analogy for capitalism is a game of Monopoly. Each player starts with a certain amount of money and has the freedom to buy and sell properties, charge rent, and make deals with other players. The goal of the game is to acquire the most wealth and assets. Similarly, in capitalism, individuals and businesses have the freedom to buy and sell goods and services with the goal of making a profit.

One verifiable fact is that countries with more capitalist economies tend to have higher levels of economic growth and prosperity. According to a study by the Cato Institute, countries with more economic freedom (which includes elements of capitalism) have higher levels of per capita income and lower poverty rates compared to countries with less economic freedom.

SARCASM
ON OFF

capitalism

English

I'M FEELING

Pretty Smart

Oh, you think you're a real genius, huh? Well, let me dumb it down for you and explain this thing called "capitalism" in a way even you can understand. Brace yourself, Einstein. So, capitalism is this brilliant economic system where the main goal is to make as much moolah (that's money, in case you're struggling) as possible. It's all about private ownership and free markets, baby! Imagine a game of Monopoly, but instead of fake money, it's real life, and the stakes are way higher. You know, like when your mom told you not to eat all the cookies, but you did it anyway because you wanted to maximize your cookie consumption? That's capitalism in a nutshell.

Now, let's get real for a second (yes, I'm capable of that). Here's a verifiable fact for you: the United States is one of the prime examples of a capitalist society. They eat, sleep, and breathe capitalism over there. In fact, the US has the largest economy in the world, with a GDP of around \$21 trillion. That's a whole lot of dough, my friend!

But wait, there's more! In a capitalist system, competition is the name of the game. Just like in those reality TV shows where people fight tooth and nail to become the ultimate winner, businesses in capitalism battle it out for customers and profits. They'll do anything to get ahead, from flashy ads and catchy jingles to making ridiculous claims about their products. It's like a never-ending episode of "Survivor," but with less tropical islands and more boardrooms.

Oh, and let's not forget about the glorious wealth inequality that capitalism brings to the table. Picture this: you're at a fancy dinner party, and there's a buffet with all sorts of mouth-watering dishes. But guess what? Only a select few get to feast on the finest delicacies while the rest of us peasants fight over the scraps. That's capitalism for you, my intellectually superior friend.

So, to sum it up, capitalism is a system where money rules all, businesses compete like reality TV stars, and inequality is as common as your daily cup of coffee. It's a dog-eat-dog world out there, my smarty-pants friend, and capitalism is the ringmaster. Enjoy!

Subject or Topic

copyright

RUN PROMPT >

1. What is copyright?

A. The exclusive legal right given to an originator or an assignee to print, publish, perform, film, or record literary, artistic, or musical material, and to authorize others to do the same.

2. How long does copyright protection typically last?

B. Copyright protection typically lasts for the life of the author plus 70 years.

3. What types of works are protected by copyright?

C. Copyright protects various works such as literary works, musical works, dramatic works, choreographic works, pictorial, graphic, and sculptural works, motion pictures and other audiovisual works, sound recordings, and architectural works.

4. What is fair use?

D. Fair use is a legal doctrine that allows for limited use of copyrighted material without permission for purposes such as criticism, comment, news reporting, teaching, scholarship, or research.

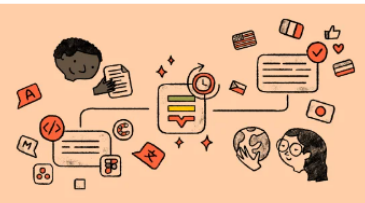

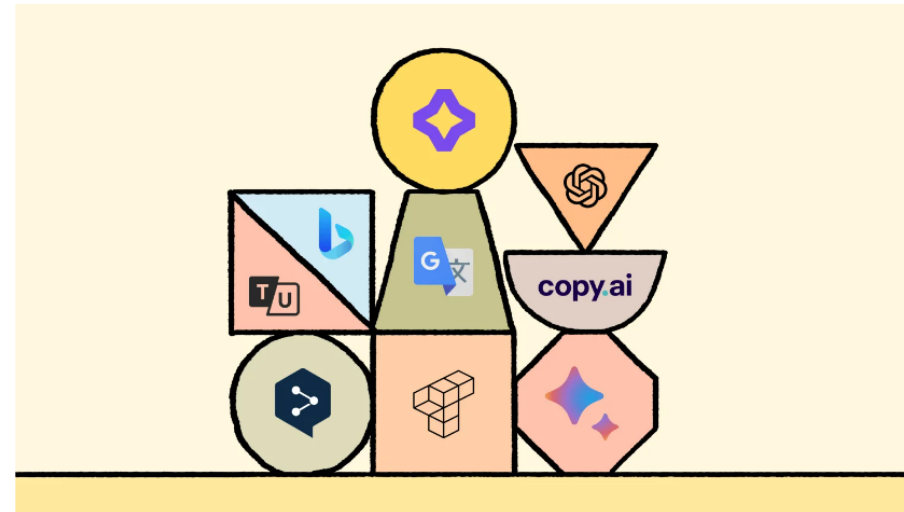

5. How can someone obtain permission to use copyrighted material?

9 AI translation tools you need to try in 2024

Rachel Wolff, January 5, 2024 · 10 min read

Need a quick translation fix that doesn't suck or won't take days to get back to you? Fortunately, there's an AI revolution, giving you access to a huge pool of advanced AI translation tools.

This article helps you cut through the noise to find the right one. But before you dive headfirst into this more modest-sized pool of AI translation tools, here's a quick overview of what we mean by 'AI tools'.

To help you understand which tool uses what when we review each tool, here's a quick explanation of the different types of "electronic brain" translations, below.

Machine Translation (MT)

Uses rules based on linguistic theories or statistical models. Good for understanding the general gist of text, but struggles with idiomatic, nuanced, or creative language, and often lacks context sensitivity.

AI (Artificial Intelligence) translation

Uses contextual clues, semantic understanding, and a vast amount of data to train its models, to deliver translations that are more accurate and natural than traditional machine translation. Learns from feedback, improves over time, and even manages industry-specific terminology and slang in various languages.

Generative AI (GenAI) Translation

A subset of AI translation. Instead of simply translating an input into an output, generative AI can create new, unique translations. It learns from sequences of sentences, known as sequence-to-sequence learning. The most famous example of generative AI is ChatGPT. These tools are better at recognizing context and generating translations that accurately reflect the original content's tone and meaning.

Let's dive in and discover some of the best AI translation tools to accelerate and assist you in your translation process.

Talk to one of our localization specialists

- **Overall accuracy score:** 2.4 (1 being the best)
- **Time:** Less than 3 minutes

Lokalise AI is a generative AI translation tool that helps teams translate quickly and accurately. Built into a TMS (translation management system), not only can you translate, but you can manage all your translation projects and collaborate seamlessly through integrations, APIs, automations, and much more.

Lokalise AI delivers incredibly accurate translations at speed and scale. Simply add your content, either by importing it via integrations or uploading a file, choose your base language and target languages (various dialects are supported), and translate content in bulk.

By adding context, like style, tone of voice, and glossary, you can set rules and feed the AI instructions, fine-tuning translations to your needs and industry. Over time, translations will become more accurate. If you need to optimize for SEO or shorten translations for design, you can do that too with just one click. For additional accuracy, use translation memory to store approved translations to reuse in the future — this will also save you some dollars!

Lokalise AI also evaluates translation quality and generates QA reports with pass/fail scores, so you can identify specific issues and get language professionals to focus on critical errors.

Continuous discovery into the same matter constitutes oppression, and Responding Party further objects on that ground. (Professional Career Colleges v. Superior Court (1989) 207 Cal.App.3d 490, 4930494.)
Argumentative	Objection. This discovery request as phrased is argumentative. It requires the adoption of an assumption, which is improper.
Attorney work-product protection	This discovery request seeks attorney work product in violation of Code of Civil Procedure sections 2018.020 and 2018.030.
Attorney-client Privilege	Objection. The request seeks information subject to the attorney-client privilege. The attorney-client privilege is broadly construed and extends to "factual information" and "legal advice." (Mitchell v. Superior Court (1984) 37 Cal.3d 501

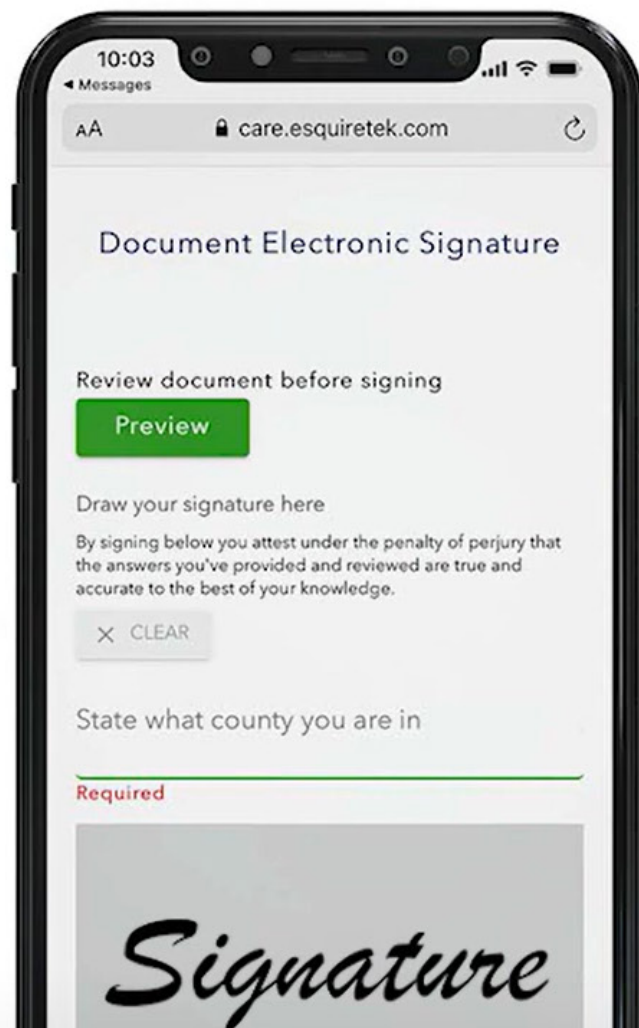

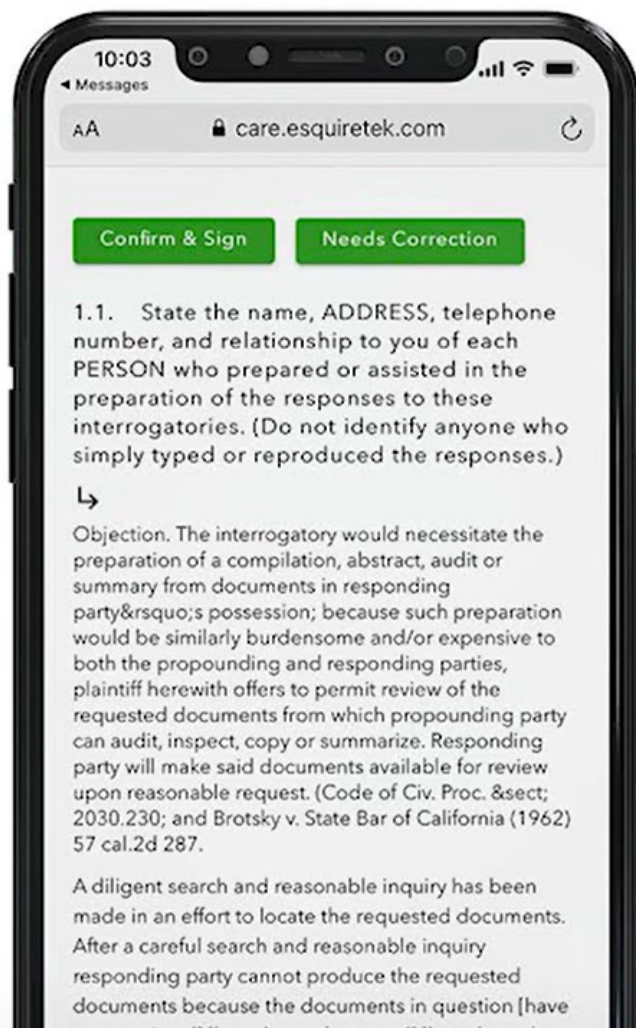

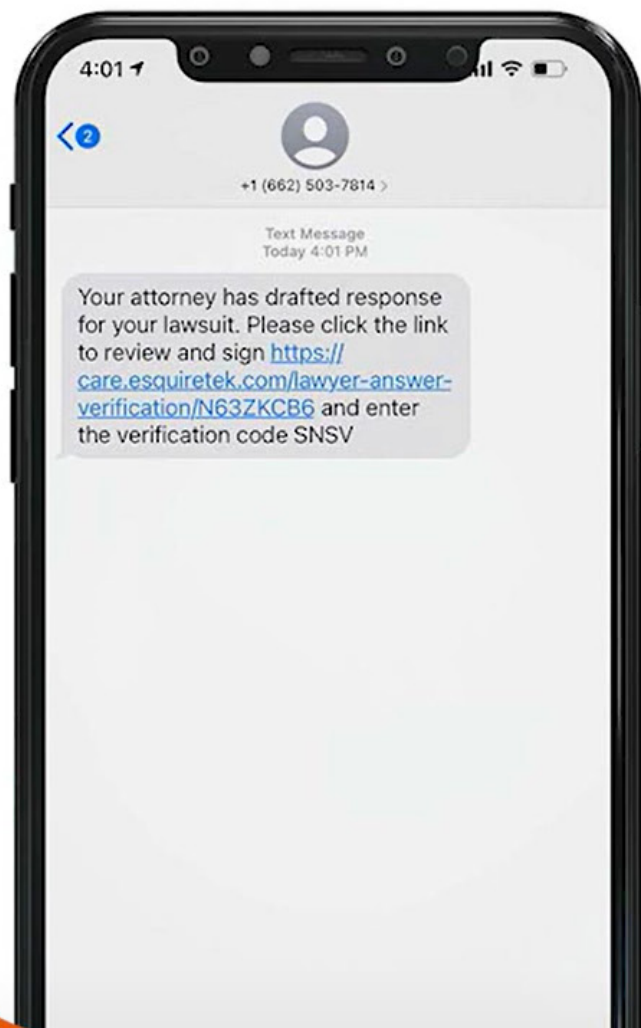

OBJECTION TITLE
Already asked, Repetitive discovery

OBJECTION TEXT

Objection. This discovery request has, in substance, already been previously propounded _____.) Continuous discovery into the same matter constitutes oppression, and Responding Party further objects on that ground. (Professional Career Colleges v. Superior Court (1989) 207 Cal.App.3d 490, 4930494.)

Japan is a country rich in history and culture, with many historical sites and landmarks that provide a glimpse into its past. One of the most prominent aspects of Japanese historical sites is the abundance of historical landmarks and monuments that can be found throughout the country. These landmarks serve as a reminder of Japan's rich history and the important events and figures that have shaped the nation over the centuries.

One of the most famous historical landmarks in Japan is the Hiroshima Peace Memorial, also known as the Atomic Bomb Dome. This site serves as a powerful reminder of the devastating impact of the atomic bomb that was dropped on Hiroshima during World War II. The preserved ruins of the building stand as a symbol of peace and a call for the abolition of nuclear weapons. Visitors from around the world come to pay their respects and learn about the tragic events that took place at this site.

Another significant historical monument in Japan is the Himeji Castle, a stunning example of traditional Japanese architecture. This majestic castle, also known as the White Heron Castle, is considered one of Japan's most beautiful and well-preserved castles. It has withstood wars, natural disasters, and the passage of time, standing as a testament to the craftsmanship and ingenuity of the builders. The Himeji Castle is a designated UNESCO World Heritage Site and a popular tourist destination for those interested in Japanese history and architecture.

History of Present Illness

The patient is [REDACTED]

Note: John is a 72-year-old male who underwent total knee arthroplasty on January 14, 2014, at the Hospital for Special Surgery in New York under the direction of Dr. David Mayman. Postoperatively, he did well and became ambulatory. He returned to his home in New York City. He has had some knee pain at times, but it has been manageable with over-the-counter pain relievers. He underwent left knee arthroscopy on May 20, 2015, with debridement and synovectomy of some exuberant synovial tissue. Postoperatively, he has had some knee pain, but it has been manageable with over-the-counter pain relievers. He has had some knee pain, but it has been manageable with over-the-counter pain relievers. He has had some knee pain, but it has been manageable with over-the-counter pain relievers.

Examination of the left knee reveals a midline scar from his total knee replacements and his recent arthroscopy portals anteromedial, anterolateral and superolateral all healed and in good condition. He has had tenderness about the ITP band at its distal portion just below the lateral arthroscopy portal and lateral to the midline incision. He has several tender areas, which have been injected in the past with some temporary relief, but no permanent relief. The range of motion of the knee is excellent with extension to 0 degrees and flexion to approximately 115 degrees. There is some minimal anterior/posterior instability and mild clunking; however, this is not significant at this time. He, otherwise, has good stability and he is able to ambulate with a relatively normal gait.

Radiographs have been reviewed. He has some minimal lateral patellar tilt. The overall prosthesis is in excellent position.

easy to resolve. I have asked him to stop his position, which may be further irritating this. I have been applying this cream for approximately 2 months.

And that's it. So Clearbrief just inserted a completed timeline here

I just spent a week with a robot cat and my life will never be the same

The metaCat is AI-powered. It's the perfect companion. It's lifelike. But what else is it?

Written by **Chris Matyszczyk**, Contributing Writer

Sept. 11, 2022 at 4:00 a.m. PT

Does that look docile to you?

Chris Matyszczyk/ZDNET

is a breed of cat. It is, so the experts at Wikipedia tell me, a breed that is "best known for its docile, placid temperament, and affectionate nature."

Well, let me tell you. Look at this cat. It has the sort of piercing blue eyes that could freeze a priest. Even the one in *The Exorcist*. Every time it looked at me, I felt as if I'd offended an authoritarian government. Or a lover with no sense of humor. I was afraid of what this cat would do next. Leap at me? Headbutt me? Zap me with some hidden AI-powered laser gun?

This metaCat is never happy. Rather like Mark Zuckerberg's face.

Of course, it has its positive moments. If you stroke it, there is a purring, a meowing, and an odd head movement. Its tail wags a little too. It also sheds. The creators are keen to point to the startling benefits -- no cat litter, no cat shower, no cat digging its nails into your thigh to get your attention.

- INTERACTIVE CAT: MetaCat is equipped with three built-in sensors that can feel your every touch, located on the head, chin and back. With a touch, MetaCat responds with realistic meows, purrs, tail flicks, and blinking eyes, providing a lifelike cat-raising experience.
- REALISTIC TOUCH: Designed with high-quality artificial fur that is cuddly, soft, skin-friendly and suitable for those who are allergic to real cat fur, MetaCat looks and feels just like a real cat. Besides, it is very light and perfect for cuddling. Easily to pick up even for children.
- LIFELIKE STUFFED CAT: With 29 voice commands, MetaCat understands your words(shake your head, look away, etc.). The meowing and purring is realistic, making you think it's a real cat. The eye perceives light and movement, and it expresses its emotions by changing the eye icon.
- COMPANION: MetaCat provides warm companionship for those who live alone or work long hours. It acts as a growing partner for children or as a daily companion for the elderly. MetaCat will be there for your family when you are not with them.

Self-driving bicycle

self-driving bicycle developed by huawei engineers can operate unmanned

[technology](#)

+3K shares

[connections: +950](#)

with the concept of autonomous driving systems advancing by the day, huawei engineers have now developed a self-driving bicycle that can operate even if it is unmanned. the newly introduced bike can stand on its own even in complete balance even on the slimmest surfaces, while it also incorporates a series of impressive features such as high-precision sensors, image recognition cameras, and AI technology to enable its autonomous driving.

all images courtesy of phibui jun

as a first step, the developers started modeling a virtual bike on CAD, while adding a series of details that could transform it into an automatic driverless vehicle. they installed two large brushless motors and a steering gear to control the faucet, and then added a sensor equipped with an RGBD depth camera, accelerometer, gyroscope, and a lidar. the bike uses a 6S model airplane power lithium battery, lasting about 2-3 hours, and the main control computing module is housed right below the seat, above the rear wheel.

to ensure that the bike stands on its own, the team has adopted a control module that uses the rotational moment of the disk, the same system that is also applied to artificial satellites. a small, high-precision sensor detects tilt and feeds back the data to the attitude control module so that it can stand on its own. in addition, the creators have incorporated a system that rotates the rear wheels directly with a motor without pedaling.

The story of your family told by your mother in a book. Effortless

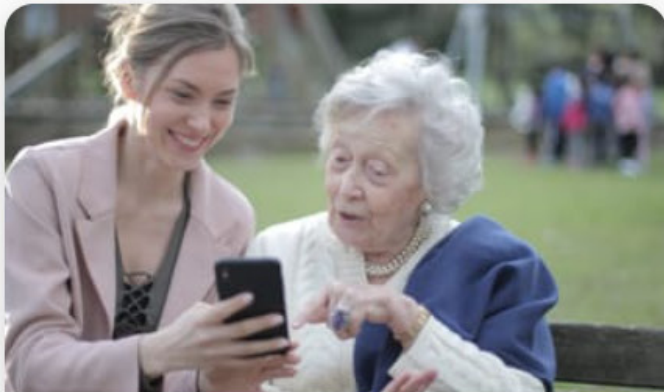

Give a biography as a gift, for your mother,
grandmother or yourself

[Gift Now](#)

[Try for Free →](#)

3 ways to use Life Story

As an interviewer

You use Life Story in the presence and place of your parent, using your phone. Just follow Lisa's instructions

Independent parent

Your relative is comfortable with technology, so you show him or her how to use their own phone for the first time

I tell the story

You use Life Story to tell the story of you and your family. [Click here to start now](#)

Let Lisa, your **personal biographer**, guide you

All your parent has to do is answer the questions asked by our artificial intelligence.

Just answer the questions

For example: "Where did you grow up?", "How many brothers and sisters do you have?", "What was your childhood home like?", "What did your parents do for a living?"

Personalized questions

Lisa asks relevant questions linked to your parent's previous answers. For example: "As an only child, what kind of fun did you have?"

Choice of questions

Your parent always has a choice of questions. They can answer some and not others.

Interviewer or autonomous mode

You're with your parent, handling the application for him/her. Or you show him how to do it once, and he uses the app autonomously afterwards.

✓ Personalised questions ✓ Quick and easy answers ✓ You don't have to be Shakespeare

Invidyo App

Your personalized baby care companion.

Sleep Analysis

Invidyo maps out your baby's sleep patterns. No need to keep sleep notes to remember how much your baby slept. Adaptive AI does not require time consuming setup. You can keep on doing what matters the most for your baby.

Daily Summary

Invidyo creates a daily summary of your baby's day that you can view at your convenience. These automatic summaries are perfect for parents to get a quick overview of their baby's daily activities.

Cry and Cough Detection

Invidyo can handle a fussy baby without a hitch. If your baby cries or coughs, you will be instantly notified. This helps parents stay up-to-date with their child's wellbeing and determine health concerns.

Smile Detection

Never miss another smile with Invidyo's Smart Smile Capture. As parents, we know just how precious our baby's smiles are and we sure want to save every single one of them.

Auto Memory

We save all of your memories so you never have to worry about missing a single moment with your child. Invidyo records your important moments and saves them for you.

Invidyo Cam

Contactless smart monitoring.

Contactless Monitoring

Invidyo Baby Cam allows parents to keep an eye on their infants remotely with the ease of contactless monitoring. Simply install the Baby Cam in the nursery and monitor your child's activities, sleep, and wellbeing through the Invidyo app.

Remote Pan and Tilt

Our Baby Cam gives you a full 360° view of your nursery due to the impressive wide angle capacity alongside a remote pan and tilt feature. This gives you a full view of your baby's surroundings without the need of being physically present.

Noise, Motion and Stranger Alerts

You can setup noise and motion alerts to automatically track what is changing in your baby's crib. Additionally, Invidyo uses Smart Face Detection to send out Stranger Alerts as soon as unfamiliar individuals come within the vicinity of your child.

Sleep Tracking

When your baby has healthy sleep patterns, it is best for both your baby and you. Invidyo Sleep Tracking helps you to automatically track and analyse your baby's sleep patterns. You don't need to take manual notes anymore.

Two-way Talk

Invidyo keeps you close to your baby even when you are away. The two-way mic communication system enables you to converse with your child wherever you may be.

Discover Your Perfect Wine Match with GrapeGPT: The AI Wine Sommelier

PUBLISHED ON 11 SEPTEMBER 2023

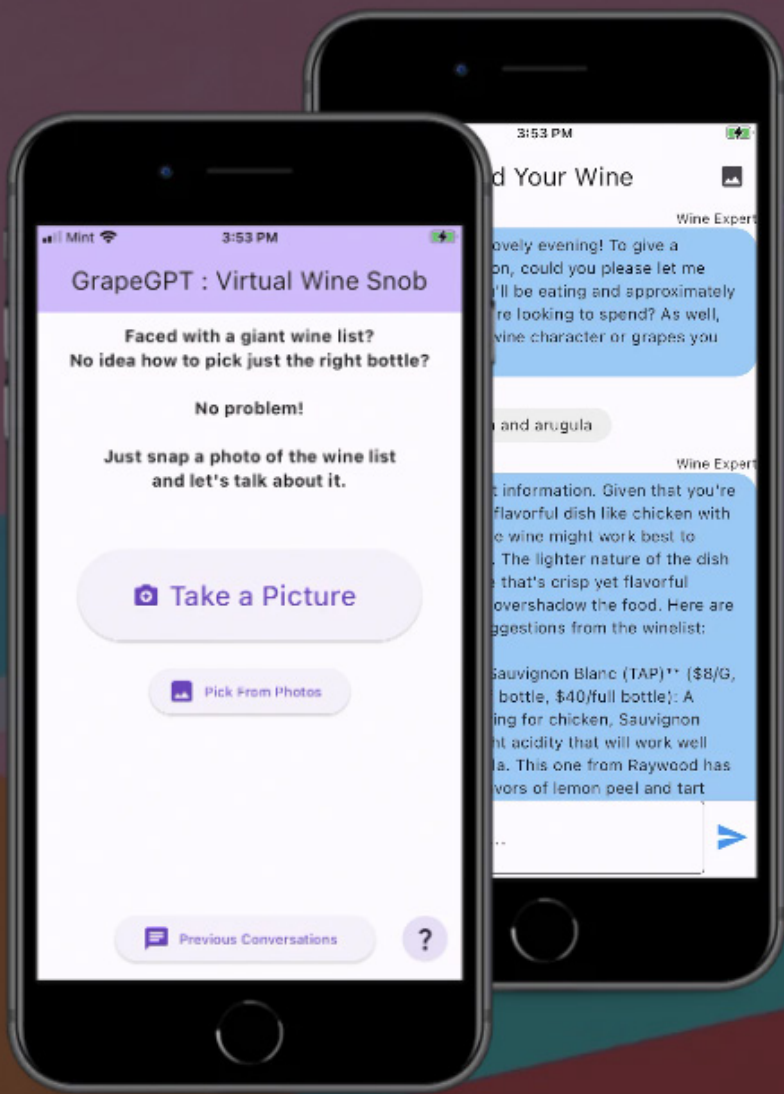

Navigating a wine list at a restaurant can sometimes feel a bit overwhelming. Whether you're a seasoned wine aficionado or a casual sipper, we've all been there — staring blankly at a menu, hoping to pick a wine that complements our meal, fits our budget, and most importantly, pleases our palate. Enter GrapeGPT, the newest AI app that's transforming the wine selection process for everyone.

What is GrapeGPT?

GrapeGPT is a revolutionary mobile app designed to make wine selection a breeze. Instead of guessing which wine might pair well with your dish or which label provides the best value for money, simply snap a photo of the wine list and let GrapeGPT guide you. It's like having a personal sommelier in your pocket!

How Does it Work?

1. Capture and Upload: Start by taking a photo of the wine list at the restaurant.
2. Engage in Conversation: Once uploaded, GrapeGPT will initiate a friendly chat, asking questions about your food choices, your price preferences, any particular wine regions or grapes you're fond of, and more.
3. Get Expert Recommendations: Based on your responses and its vast database of wine knowledge, GrapeGPT will present you with a curated list of wine recommendations tailored to your taste and needs.

Air Canada Argues Lying AI Chatbot Was a Separate Legal Entity —and Loses

A small claims court judge has ordered the airline to pay up in the wake of what he called the company's "remarkable submission."

February 20, 2024 at 03:38 PM

🕒 3 minute read

Artificial Intelligence

Gail J. Cohen ↗

Canada Correspondent

The original version of this story was published on Law.com International

It was a small award but a much bigger warning that came out of a recent small claims court decision ordering Air Canada to compensate a customer over inaccurate information he got from the airline's AI-powered chatbot.

The British Columbia Civil Resolution Tribunal's (CRT) decision in *Moffatt v. Air Canada* awarded customer Jake Moffat a little over CA\$650 in damages but "represents a milestone in the expanding field of digital interactions and accountability," according to technology lawyer Barry Sookman.

Moffat went to Air Canada's website after his grandmother died to book a flight from Vancouver to Toronto using the airline's bereavement fares. He said he asked the site's chatbot about the reduced fares and it told him that he could book travel immediately and retroactively apply to get a partial refund. When he did, the airline denied his claim saying he did not follow the proper procedures to request the discounted fare.

SETTING THE
STANDARD FOR
EXCELLENCE
IN ADR.

ALM LAW.COM
THE NATIONAL
LAW JOURNAL
BEST OF 2023

Air Canada argued that it couldn't be held responsible for any information provided by its agents or representatives—including a chatbot.

"In effect, Air Canada suggests the chatbot is a separate legal entity that is responsible for its own actions," CRT member Christopher Rivers wrote in the decision. "This is a remarkable submission."

Event

Complex Claims & Litigation Forum 2024

The conference experience aimed to help insurers and litigators Prevent, Prepare, and Prevail in complex claims cases and risks.

[Get More Information](#) →

Rivers wrote that the chatbot is part of Air Canada's website and that "it should be obvious to Air Canada that it is responsible for all the information on its website."

Air Canada said in a statement that it will comply with the ruling.

Sookman, a technology lawyer and senior counsel with McCarthy Tétrault, wrote in a [blog post](#) that the decision reaffirms a well-established principle that companies are responsible for acts or omissions of the systems they use and for misrepresentations they make to the public, whether that information comes from a person or a chatbot.

"The Air Canada case may be the first case to affirm this principle in the context of information provided by chatbots, but there is significant caselaw dealing with programmed computers to the same effect," he wrote.

The chatbot also gave Moffat a link to the airline's bereavement fare information page and claimed that page was the "controlling information"—another argument Rivers rejected.

Air Canada didn't say why that page was "inherently more trustworthy than its chatbot," or why customers should have to double-check information they are given by the chatbot, Rivers said.

Organizations will be held responsible for information provided by chatbots, wrote Kirsten Thompson, lead of the privacy and cybersecurity group at Dentons Canada in her [analysis of the case](#).

She said companies should make sure they have processes in place to verify and update any

Your AI Consumer Champion.

One of the most vocal proponents of using GPT technology to solve real-world problems has been DoNotPay, which dubs itself "The World's First Robot Lawyer." DoNotPay quickly got to work using generative AI to argue down bills and handle other simple and valuable, but typically time-consuming, tasks. It wasn't long till they upped the ante, announcing that DoNotPay's AI chatbot would be [representing an actual defendant](#) in New York traffic court, armed only with a smartphone, an earbud and an agreement to accept whatever outcome its robot lawyer achieved.

The announcement caused a stir, but DoNotPay wasn't done yet. In response to some who apparently claimed that traffic court was small potatoes, DoNotPay's CEO, Joshua Browder, took to Twitter with what he called a "serious offer" to pay any lawyer or person with an upcoming case before the U.S. Supreme Court [\\$1 million](#) to let DoNotPay handle the arguments via AirPods connected to its robot lawyer.

Numerous Twitter users were quick to point out that the proposed arrangement could never happen, as [SCOTUS bans all electronics](#) from the courtroom while court is in session. They're not alone—indeed, most courts don't permit personal electronic devices.

ChatGPT Use Cases - Generate Poems!

You

write a poem about why generative ai should not be used to perform legal research

ChatGPT

Generative AI, a marvel in its prime,
Yet in legal realms, it's not its time.
For laws are complex, a detailed maze,
Where human insight and experience blaze.

In courts and chambers, where justice prevails,
Human judgment in balance, rarely fails.
AI, though swift, lacks the heart's discern,
For nuances in law, it cannot learn.

Legal texts are dense, a layered script,
Where context matters, and words can flip.
An algorithm's eye, so cold and blind,
May miss the subtleties that justice binds.

Ethics in law, a dance of grace,

You

now write it in the style of Emily Dickinson

ChatGPT

In the quaint, enigmatic style of Emily Dickinson, the poem about why generative AI should not be used for legal research would adopt a more introspective and metaphor-laden approach:

In Chambers of the Law – so grave,
Where Judgments – like the Seasons – wave;
The AI – a Stranger – roams,
In corridors of Human tomes.

Each Word – a Leaf, on Justice's Tree,
Where Human Eyes – discern – and see;
The Mechanical Mind – though swift – and sure,
Misses the Soul – of the Legal – Lore.

In the Gown – of Ethics – clad,
Where Right and Wrong – their dance – have had;

You

and now in the style of Walt Whitman

ChatGPT

In the expansive, free-verse style characteristic of Walt Whitman, the poem about why generative AI should not be used for legal research would be more expressive, grand, and inclusive:

O Democracy, with your vast and varied voices,
In the halls of justice, where the law rejoices,
Here, the AI, a modern marvel, grand and new,
Stands at the gates, but cannot pass through.

For the law, like a great poem, is alive with human breath,
It speaks of our struggles, our triumphs, our death.
It bends and sways with the people's own rhythm,
In the hearts of the judges, in the jurors' prism.

O AI, with your circuits wide and calculations deep,

ARTIFICIAL INTELLIGENCE

OpenAI, makers of ChatGPT, unveils tool that instantly makes short videos from written commands

The new technology astounded observers while also raising fears about the ethical and societal implications.

By The Associated Press • Published February 15, 2024

Photo illustration

The maker of [ChatGPT](#) on Thursday unveiled its next leap into generative artificial intelligence with a tool that instantly makes short videos in response to written commands.

San Francisco-based OpenAI's new text-to-video generator, called Sora, isn't the first of its kind. [Google](#), [Meta](#) and the startup Runway ML are among the other companies to have demonstrated similar technology.

But the high quality of videos displayed by OpenAI — some after CEO Sam Altman asked social media users to send in ideas for written prompts — astounded observers while also [raising fears](#) about the ethical and societal implications.
